## about the client

LT support are a new start recruitment agency in the education and care sectors, it's owner and director Laura Tanner has 19 years experience in recruitment so both their candidates and clients get a trusted partner they can rely on to understand their requirements.

## overview

As an agency just starting up it was really important that LT support chose a partner that could provide access to cash flow in conjunction with innovative back office software where all business activities can be carried out and tracked in one place. At **giant finance+** that's exactly what we provide, not only can they see a real time snap shot of their finances but our team of recruitment experts are here to support them every step of the way.

"I first met with Rich Foster, sales and client director for **giant finance+** and I instantly felt confident that I was speaking to someone who knew exactly what they were talking about.

After speaking with other financiers, it was a really easy decision to choose **giant** and i'm glad I did! They have something called Hypercare where Lauren provides regular catch up's to ensure that I am fully supported, I never have to wait too long for a reply to any query I send across.

The training delivered by the client managers has been so thorough and was supported by really handy documents that I can refer to at any time.

It can be very stressful starting a new business but **giant finance+** have helped remove the pressure allowing me to enjoy this time. "

Laura Tanner, director & owner
